PRESSURE	TEMPERATURE	LEVEL	FLOW	CALIBRATION

Part of your business

WIKAI – Your partner in the Oil & Gas industries

The Oil & Gas industry makes extremely high demands on all instruments used within the process. They are subject to strict international guidelines like the PED and ATEX. Electronic and mechanical measuring instruments for pressure, temperature and level are used for general applications as well as in potentially explosive areas, and must operate as satisfactorily in aggressive environments as in non-aggressive environments.

WIKAI Instrumentation Corporation (Thailand) Co.,Ltd.
